Art Unit: 3624

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 are, drawn to a method of notifying an exception client, classified in class 705, subclass various.
- II. Claims 11-19 are drawn to an exception notification system, classified in class 382, subclass various.
- III. Claim 20 is, drawn to an associated exception notification system, classified in class 382, subclass various.
- IV. Claims 21-22 are directed to a method for producing an exception item classified in class 705.
- V. Claims 25-25 are drawn to a method of providing authorization, classified in class 707, subclass various.

a) If Group I is elected, Groups II and III can be prosecuted therewith.

b) If Group I is elected, the following species election is required.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions IV and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination (Compare claim 1 and 21). The subcombination has separate utility such as an authorization method.

Art Unit: 3624

4. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as a method for providing authorization. See MPEP § 806.05(d).

5. Inventions II and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a method and an email file have different functions.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group IV and V, restriction for examination purposes as indicated is proper.

Respectfully
